

SOUTHEAST CRESCENT REGIONAL COMMISSION

Crescent Care

J-1 Visa Waiver Program

Guidelines

Access to quality, affordable healthcare is a fundamental pillar of the Southeast Crescent Regional Commission (“SCRC” or “Commission”) mission. SCRC is committed to programs that are economic development engines in their communities and provide essential services to stakeholders in the region.

SCRC’s policy is completely discretionary, voluntary, and may be modified or terminated at any time without notice. In all instances, SCRC reserves the right to recommend or decline any request for a waiver. Additionally, SCRC reserves the right for periodic review and possible revision of the program.

SCRC region is comprised of the areas of Virginia, North Carolina, South Carolina, Georgia, Alabama, Mississippi, and all of Florida. SCRC will use the footprint of our region for potential applications. Applications submitted outside of the region will not be reviewed at this time. SCRC will work with its member states J-1 Waiver division during the process of the waiver and will take into account the information provided by the state should they provide the information within the allotted time frame given by the Commission.

The guidelines are requirements with which employers, immigration attorneys, and physician applicants must comply for consideration of a J-1 Visa Waiver recommendation from the Commission.

1. The employer’s first major prerequisite before requesting a J-1 visa waiver is to make a good-faith effort to recruit an American physician for the opportunity in the same salary range, without success, for a period of 45 days.

SCRC requires evidence of recruitment on three levels: national, in-state, and state medical school recruitment.

All documentation of advertising and recruitment must be specifically targeted to the employment opportunity (e.g., practice type, specific location, and specific employer).

Acceptable documentation shall include copies of advertisements for the position published in newspapers, journals, copies of letters to state medical schools, targeted mailings, and/or copies of on-line advertisements that specifically target the practice opportunity. All documentation must include evidence of advertising duration.

Examples of out-of-state publications which are acceptable include newspapers with national circulation (such as *USA Today* or *The Wall Street Journal*) or medical journals (such as *JAMA* or the *New England Journal of Medicine*).

Examples of in-state publications which are acceptable include newspapers with major in- state circulation (such as *CHARLESTON POST & COURIER*, *The Miami Herald*, or *ATLANTA JOURNAL-CONSTITUTION*), publications which are circulated in the practice area such as local newspapers/magazines, or in-state medical journals or publications.

2. The physician must agree to provide primary medical care for not less than forty (40) hours per week, or 160 hours per month, at a site in a Health Professional Shortage Area (HPSA), Mental Health Professional Shortage Area (MHPSA), Medically Underserved Area (MUA), or Medically Underserved Population (MUP) as designated by the Secretary of the U.S. Department of Health and Human Services, within the congressionally defined SCRC footprint for a minimum of three years or longer. Primary medical care is defined as general or family practice, general internal medicine, pediatrics, obstetrics/gynecology and psychiatry (MHPSA).

The Commission may also make wavier recommendations for physicians who wish to practice specialty medicine, given the following information is provided in addition to the requirements for primary care medicine are met:

- ▶ A letter from the sponsor outlining the reasons a physician or an additional physician with this particular specialty is needed in this area. The letter should contain information describing the particular need for the specialist. The letter shall also contain information concerning the impact of this service not being adequately available

to the area, the closest location where this specialty is available if not in this area and whether public transportation is available, and evidence that a physician of this specialty would be viable in the service area.

- ▶ A description of the service area demographics and any other information SCRC may use to determine exceptional need for the specialty.
 - ▶ A letter of support from the Chief Medical Officer of the facility to which the J-1 physician would provide services to patients addressing the need for this specialty.
 - ▶ At least two (2) letters of support from representatives of primary care centers and primary care physician practices (not affiliated with the sponsor) in the area addressing the need for this specialty; and
 - ▶ Any additional evidence that would demonstrate the shortage and need for the specialist, such as letters of support from other physicians of the same specialty or local health officers in the service area.
3. The employment contract between the physician and the employer shall not contain a non-compete clause or any other restrictive covenant enforceable against the foreign medical graduate after the tenure of the contract period.
 4. The physician shall provide a copy of his or her state medical license or provide evidence of the filing of a license application. A copy of the state medical license must be received by the Commission by the time the “Physician Employment Verification Form,” is filed in the first week the physician begins work.
 5. The physician shall provide SCRC with copies of all his or her Certificates of Eligibility for Exchange Visitor (J-1) Status, forms IAP-66/DS-2019, and any other documentation needed to verify status.
 6. It is federal policy that the facility or practice sponsoring the physician must agree to provide health services to individuals without discriminating against them because: (a) they were unable to pay for those services or (b) payment for those health services will be made under Medicare and Medicaid, or a state equivalent indigent health care program. Furthermore, the facility should provide care on a sliding fee payment arrangement for uninsured, low-income patients and have this notice publicly posted in the facility.

Therefore, the application must include a statement, signed and dated by the

head of the healthcare facility at which the foreign medical graduate will be employed, addressing the following:

- ▶ The facility is in SCRC's congressionally mandated footprint and designated by the Secretary of the U.S. Department of Health and Human Services as a Health Professional Shortage Area (HPSA), Mental Health Professional Shortage Area (MHPSA), Medically Underserved Area (MUA), or Medically Underserved Population (MUP), including the shortage designation identification number.
 - ▶ The facility's recent history serving Medicare, Medicaid and medically indigent patients by providing patient data for the three most-recent years of service as well as their continuing intentions to serve such individuals.
 - ▶ The current patient-to-physician ratios in the practice area, which should be described geographically and demographically in detail in the statement.
 - ▶ The name of the physician, area of study, and how these skills will impact patients at this facility.
7. The physician and employer must sign the Commission's "J-1 Visa Waiver Program Guidelines." The physician must sign the Commission's "J-1 Visa Waiver Program Affidavit and Agreement" prior to consideration by SCRC of the request and must comply with the terms and conditions set forth in those documents.
 8. All requests approved initially by SCRC and approved subsequently by the U.S. Citizenship and Immigration Service will be subject to the periodic review by SCRC for compliance with this policy statement and other applicable laws. An employer's failure to comply in good faith with this waiver policy will be considered in the evaluation of other applications involving the same employer.
 9. SCRC does not provide letters of support or no objection for any instances of change in employment status since the agency cannot and does not determine extenuating circumstances. On a case-by-case basis, SCRC will consider providing letters of support for previously recommended physicians seeking to add another eligible healthcare facility to their list of work sites.
 10. If the employment contract specified in Section 2 provides for a minimum of five years employment, SCRC will accept a request for a National Interest Waiver (NIW) support letter.

11. The J-1 physician shall submit a personal statement indicating the reasons for not wishing to fulfill the two-year home country residence requirement to which the physician agreed to at the time of accepting the exchange visitor status.
12. SCRC's J-1 Visa Waiver Application Package should include an application processing fee in the amount of \$3,000.00. This fee will be non-refundable. Make check or money order payable to the Southeast Regional Commission.
13. SCRC will strive to use the respective states' patient-to-physician ratio to place physicians in those respective states. However, in special need situations, SCRC reserves the right to use a minimum patient-to-physician ratio of 2,000 to 1 to qualify the physician for placement.
14. SCRC does expedite the review of J-1 Visa Waiver Application Packages for an additional fee of \$3,000 and is non-refundable. Please allow at least 45 business days for processing.

I have read, fully understand, and comply with the policies and provisions set forth in this document by the Southeast Regional Commission.
